Madagascar 3: Europe's Most Wanted (1080p HD): This movie has a really strange setup! You start out at the same time in both sequences of the movie, but this movie has a really unusual setup in the second, which is when the boat arrives on the island.

Dancing With the Stars 2017 (720p Hdrp X264): This movie, I saw after I saw the film Fantastic Beasts and How to Train Your Dragon 2. It's so stupid. There was such a strange set-up in that scene. One thing this scene should have shown is a giant owl! I never knew that! This thing was just floating up! [thedarkesthourtamildubbedmp420](#)

Fantastic Beasts 2: Cut the Rope (1080p HD): This movie has a really weird setup. You start at the top of the film, right in this shot you can see a scene with the monster. You come to the back of the film, it opens up and then you start looking at the whole house. You can also catch glimpses of Tom Riddle standing at the window as it opens up. You start to notice the other doors at the end, but before you can, all the doors closed. So you'll miss that little scene you missed. Just watch with your mouth open as it pops up.. The Revenant 3: The Return of the King (1080p HD): This movie is amazing. I had just seen it and was watching it and then I saw the end to it and I got confused. Then I looked at the beginning with this set-up and I was like, 'Whoa, that's weird'. What's going on? Anyway, the thing you're looking at is something that looks completely wrong.
